Julia Mulroy is an amazing 16-year-old girl who was diagnosed with Focal Segmental Glomerulosclerosis (FSGS). FSGS is a rare kidney disease that has NO KNOWN CURE. Julia is in end-stage renal failure and receives dialysis 3x per week. She is currently waiting for a kidney transplant. Having a new kidney to replace her failing ones will give her the greatest chance of living a long life. All funds raised will be donated directly to the Mulroy Family.
